Observations

- ① The ans subarray will contain exactly 1 min & 1 max
- ② The max & min will always be in the boundary of the ans subarray.

Q Given an array. Given Q queries each representing a subarray (L, R) & o/e

L, R, O \Rightarrow Return sum of all odd indexed elements from L to R
or

L, R, e \Rightarrow Return sum of all even indexed elements from L to R.
